Product Description

QSi★ is an integrated, electronic information management system designed to drive managerial productivity and effectiveness.

Create the performance-enhancing visibility and accountability you've been looking for.

Our turnkey solution is pre-loaded on a server we provide, and is tailored by SatiStar to meet your specific needs. SatiStar's commitment also includes unlimited tailoring as your business needs evolve, and as you discover the power this solution provides.

The system has benefited from over 30 years of development and has been successfully installed at several thousand locations worldwide. It is highly robust, and offers superb support to your staff for functions ranging from document and data control, training, corrective action, product non-conformances, meeting follow-up, contact management (including complaints), project management and many others.

QSi★ includes powerful and flexible electronic document management - including version control, electronic approvals, automatic alerts and escalation features that reduce administrative burden.

Features:

- Designed with closed-loop information and content management logic
